*Presents*

**Science and Metropolitan America:  
Research and Civic Responsibility**

**WEDNESDAY, APRIL 2**

**12PM-1:00PM, RM 28 COE**

**William F. Tate IV**

*Edward Mallinckrodt Distinguished  
University Professor in Arts & Sciences  
Washington University in St. Louis*

*2007-2008 President  
American Educational Research Association*

The purpose of this lecture is to discuss the relationship between development regimes associated with science and the developmental sciences broadly defined.

A specific focus will be on the spatial dimensions of opportunity in the context of metropolitan America. Trends from metropolitan Dallas and St. Louis will inform this discussion of research, regional development, and civic responsibility.
