

## Application sharing in Elluminate

During Elluminate session, if you want to share some documents or application with your students, here is a good practice provided by C & I 572 Su 08 course.

1. Open the website or applications you wish to share with your students in Elluminate session.

2. Click on “Application sharing icon ” or use Tools>Application sharing>Host applications menu.

- To select an application, click the application tab. All the applications currently visible on your desktop will be listed. Choose the application you wish to share.
- To select a region, click the region tab. You will be shown a graphical representation of your desktop’s window layout. Click on the region you wish to share. The selected region will be highlighted.

3. To quickly share your entire desk top, use Tools>Application sharing>Share entire desktop. You can see pop-up screen, Share your entire desktop?

4. If you click “YES”, your screen will be shared.
