

Notes of Group Presentation in the Elluminate

2009/7/30

Elluminate has nice synchronous features which makes group projects presentation available. Here are some instructions for instructors who would like to include group presentation as part of your classroom assignments.

1. There are multiple ways for students do presentation, namely Application Sharing, upload PPT slides to whiteboard(like what you always teach), and Web Tours. Students can choose the way which best fits their group projects.
2. Group projects for online students may take longer time and efforts than on campus students. Keep students notified in the beginning in case they have enough time to arrange and finish their group works.
3. Ask your students to read the [presentation guideline](#) in Student Orientation page.
4. Ask your students to send their powerpoint slides to TAs or GAs in advance.
5. Generally, Education Online GAs will take care of most of the presentation issues. However, for large class session or parallel presentations in different rooms, we might need several helps from you and TAs:
 - (1) Grant/Remove group members to be moderators temporally if they need whiteboard.
 - (2) Delete surplus slides because the whiteboard may be full.
 - (3) Monitor on any echoing and feedback issues.

Please schedule a meeting with TAs and Gas one week earlier, we will go through all the needed technical trainings.
